| [cccc] Resum de codis / Summary of codes (ca, aran, es, fr, en): ► | (al final / at the bottom) |
| Llengües / Languages | http://plantipodes.cat/lng |
| Informació general / General information | http://plantipodes.cat/generaldb |
| Imatges externes: La seva identitat pot no ser exacta External Images: Their identity may be inaccurate | |

Els **noms científics** estan formats per noms llatins o llatinitzats, se solen escriure en *llitra cursiva* (si el text general és en lletra rodona). La resta de components (f., var., subsp., x, nom. illeg., nom. superfl., opus utique oppr., etc.) així com també els noms dels '**Cultivars**' i dels **Autors** (i: &, al., auct., ex) van en la lletra normal en que s'està escrivint. Aquí, de moment, per conveniència cada registre de la base té una única mena de lletra.

Scientific names are formed by Latin or Latinized names, they are usually written in *italics* (if the text is written in a regular type). The rest of the components (f., var., subsp., x, name illeg., nom. superfl., opus utique oppr., etc.), as well as the names of the '**Cultivars**' and the **Authors** (and: &, al., auct., ex) should be written in the same type as the rest of the text. Here, for the moment, for convenience, a single type of letter has been used for each record in the database.

Corylus , aprox. 2b

2018-07-31
